

## New Reminder

The new reminder function has now been placed in the top right hand corner of your system.

This allows you to create a follow up reminder for any candidates or clients wherever you are on the system.

This means that if you are struck by a flash of inspiration about a client while you are in the candidates page, you can simply click on the new reminder icon and set a reminder for yourself or your colleagues so that you can call them.

You can then carry on with your work be it in the candidates, clients, jobs or anywhere else you may be on the system.
